

‘Kungatsiajuk’ Oral Health Toolkit

Supporting the Healthy Smiles of NunatuKavut Children and Youth

An Oral Health Toolkit

for health professionals, educators, caregivers and parents

Meet the Research Team

INVESTIGATORS

Debbie Martin (Nominated-PI)

Assistant Professor
School of Health and Human Performance
Dalhousie University

Mary McNally (CO-PI)

Professor
Faculties of Dentistry and Medicine
Dalhousie University

Heather Castleden (CO-PI)

Associate Professor
Departments of Geography and Public Health Sciences
Queens University

Debora Matthews

Professor
Faculty of Dentistry
Dalhousie University

Mark Filiaggi

Associate Vice President (Research)
Professor
Faculties of Dentistry and Medicine
Dalhousie University

Joanne Clovis (Ret.)

Adjunct Professor
Faculty of Dentistry, School of Dental Hygiene
Dalhousie University

Ferne Kraglund

Assistant Professor
Faculty of Dentistry
Dalhousie University

Jennifer MacLellan

Assistant Professor
Division of Pediatric Dentistry, Faculty of Dentistry
Dalhousie University

Stephen Bornstein

Director, Newfoundland & Labrador Centre for Applied Health
Research
Memorial University of Newfoundland

COLLABORATORS

Darlene Wall

Social Sector Manager, NunatuKavut

Sandra Crowell

Adjunct Professor
Faculty of Health Professions
Dalhousie University

Rosamund Harrison

Professor
Division of Pediatric Dentistry
University of British Columbia

Peter J. Hornett (Ret.)

Chief of Dental Services
Labrador-Grenfell Regional
Integrated Health Authority

John Graham

Community-based Program Consultant
Newfoundland & Labrador

RESEARCH STAFF

Iona Worden Driscoll

Research Coordinator
Healthy Populations Institute (HPI formerly AHPRC)
Dalhousie University

Michelle Clarke

Healthy Smiles Coordinator
Kungatsiajuk: Supporting the Healthy Smiles of NunatuKavut
Children
Dalhousie University

Marissa Ley

Research Assistant
Healthy Populations Institute (HPI formerly AHPRC)
Dalhousie University

COMMUNITY ADVISORS

Regan Burden (Youth Representative) – Port Hope Simpson

Laverne Campbell – Charlottetown

Megan Hudson – Port Hope Simpson/Goose Bay

Joan Jenkins – St. Lewis

Judy Pardy – Cartwright

Margaret Rumbolt – Mary's Harbour

The Kungatsiajuk: Supporting the Healthy Smiles of NunatuKavut Children research project was supported by the Canadian Institutes of Health Research <http://www.cihr-irsc.gc.ca>. Permission has been provided to reproduce and distribute oral health educational materials available from Alberta Health Services, Calgary Zone; the New Brunswick Dental Society: Oral Health in the Classroom; and Kool Smiles: General Dentistry for Kids and Parents.

Kungatsiajuk Oral Health Toolkit

Welcome to the Kungatsiajuk Oral Health Toolkit! This toolkit contains educational information and fun, hands-on activities to assist health professionals (nurses, dieticians, doctors), educators, caregivers and parents in supporting healthy smiles for children and youth.

The toolkit is organized into four color-coded sections:

Section 1: Learning About Teeth

Section 2: Caring for Your Teeth

Section 3: Visiting the Dentist

Section 4: Making Healthy Choices

Each section includes both educational information and hands-on activities. We encourage you to think of multiple ways to use the information and activities in your classroom/group.

We hope you enjoy using these resources to help children and youth in your life learn about oral health.

This toolkit may be reproduced in whole or part for non-commercial use provided credit is given to *Kungatsiajuk: Supporting the Healthy Smiles of NunatuKavut Children*.

About the 'Kungatsiajuk: Supporting the Healthy Smiles of NunatuKavut children' research project

Kungatsiajuk means "healthy smile" in Inuktitut. The purpose of this project was to collect information about the oral health of children and youth in NunatuKavut. It has involved 18 focus groups, 13 key informant interviews, and 290 dental examinations of children and youth in NunatuKavut.

Why is oral health important?

Oral health refers to the health of a person's teeth, gums and whole mouth. Having good oral health is important, because it allows us to eat, speak and talk without pain or embarrassment. Pain and infection in the mouth can cause us to miss time from school, work and other activities. In children, pain and infection can harm their growth and self-confidence. Our eating habits and food choices are also directly affected by our oral health.

Learning about oral health is important, because it gives us information about the overall health of a community. This is because oral diseases also share many of the same risk factors as other diseases such as diabetes, heart disease and cancer. Poor nutrition and smoking are related to all of these.

What have we done?

Since collecting our data, we have been busy sharing what we have learned in the form of fact sheets, blogs, a youth film making workshop (resulting in a film) and an Oral Health Forum in Halifax, Nova Scotia (February, 2015). This toolkit is the final result of all of our research and knowledge translation activities, and was brought to community members for review in the Fall of 2015.

For more information about our research project, please visit our website and Facebook page:
